

Duesenberg

NOT ALL WORKS OF ART BELONG ON THE WALL

Introduction

Duesenberg Guitars are a unique combination of German engineering and classic art-deco styling.

They deliver tones from the golden age

of Rock 'n' Roll with playability features incorporating modern guitar innovations.

Our guitars will feel as comfortable as a vintage favorite, yet will delight you with their subtle and useful enhancements.

Built to last, our premium hardware reflects vintage sensibilities. Incorporating modern design and functional improvements alleviates the need to upgrade with after-market parts or accessories.

Our headstock, hardware and pickguard echo the elegant and unique art-deco styling creating a guitar built with the refinements of yesterday. Our custom made pickups with alnico magnets are warm, cutting and distinctive. They are an excellent match for either vintage-styled or modern hi-gain amplifier designs.

Since the mid 1990s, Duesenberg has tirelessly focused on developing a line of guitars and basses that meets and exceeds the demands of a seasoned professional. Each Duesenberg guitar and bass has been painstakingly hand assembled by guitarists like you – making Duesenberg one of the finest sounding and playing guitars in the world.

Thank you for your time in learning about Duesenberg Guitars.

Sincerely,
Dieter Goelsdorf,
Founder and Designer of Duesenberg Guitars

Duesenberg DP90 Single Coil Pickups

Duesenberg Grand Vintage
Humbuckers Pickups

Duesenberg Crunchbuckers Pickups

Duesenberg-V Single Coil Pickups
with Single Alnico Magnets

Additional Information:

The Duesenberg Super Tremola is designed for comfortable playing and stringing.

The string ball ends are simply put through the 6 holes of the roller instead of putting them onto pins. This will save time and nerves.

The down-holder roller has six guided groves to position the strings automatically.

The Duesenberg Tremola also comes with an adjustable round tremolo arm.

The wiring of each Duesenberg has been configured to split the mid-shift functions for greater additional tones without lessening the volume output.

Ron Wood

Signature Model

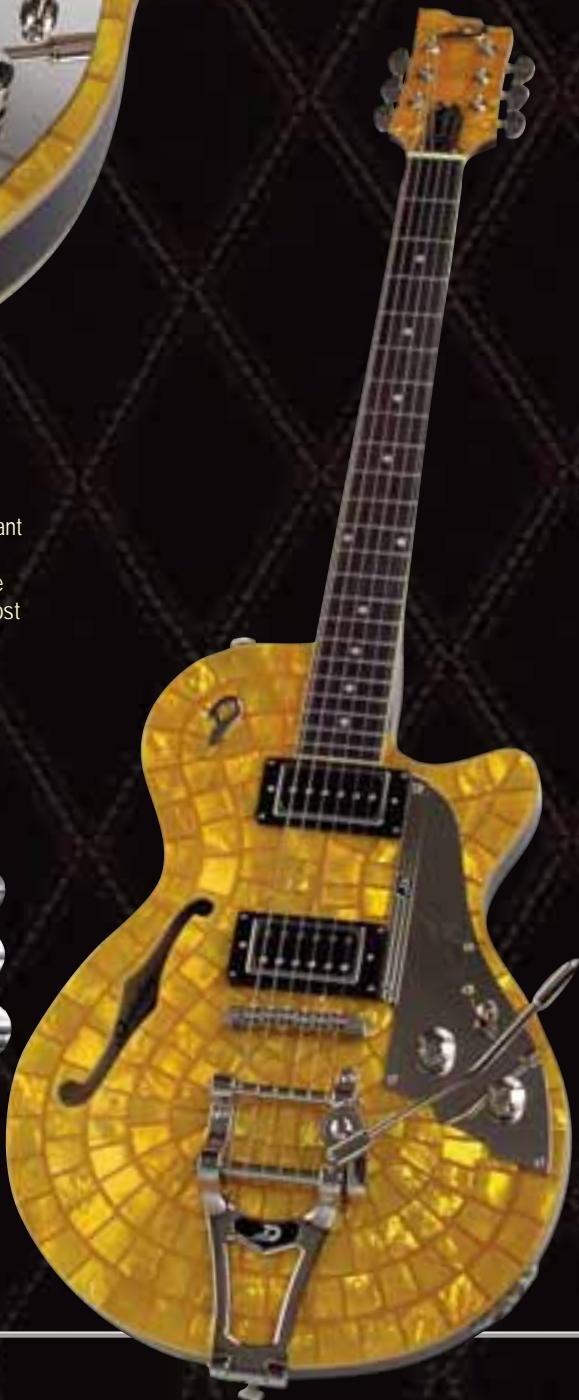

DTV Ron Wood

A limited edition DTV, the DRW comes with an elegant circular mother-of-pearl mosaic top and headstock design complete with Ron's etched signature on the nickel-plated brass pickguard. This is one of the most unique and eye catching guitar designs in decades. This guitar is prominently displayed on the recent Rolling Stones DVD 4-pack.

Pearl-Top

Starplayer TV

DTV Starplayer TV

Our semi-hollow deluxe guitar is played by many of the top players in the world. The Starplayer-TV features a greatly improved 60s style tremolo and a floating bridge with steel saddles. Our custom-wound DP90 in the neck position gives an authentic blues tone making a versatile combination with the vintage Humbucker in the bridge position. The distinctive arched spruce top and elegant flamed maple arched back has elevated the DTV to one of the finest guitars in the world. It will remind you of the time when Rock 'n' Roll was young.

Carl Carlton

Signature Model

DCC Carl Carlton

This signature line model is a full-sized, semi-hollow guitar with the playability and rich, creamy and full tones of a solid body guitar. You will not want to put this guitar down. It is equally at home in a jazz or hard rock gig. The DCC will slide you back in time as the vintage tones escape from your first chord or bend!

Imperial

DIM Imperial

The new Imperial takes you back to a time when rock was around the clock. The Imperial is a large, hollow-body guitar with two classic F-holes tied with the body thickness of vintage rockabilly guitars. Its classic look and fantastic rich tones, delivered from our custom Duesenberg pick-ups, allows this modern classic to revisit the past with today's high tech appointments.

Double Cat

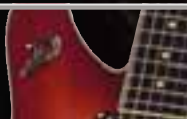

DDC Double Cat

The New Duesenberg Cat embodies all of the classic styles of Duesenberg with each aspect of this guitar showing our commitment to quality. The DDC is a new line of hollow-body guitars with the classic double cut-away look and feel. The already classic sound of Duesenberg has engulfed this Cat and it seems to be ready to get out of its cage. Making this Cat complete is our custom pickups tying it together with our DP90 up front. The only thing this Cat needs is a playmate...

Rocket

DRK Rocket

The New Duesenberg Rocket has taken off and is now setting the rock world on fire. The classic rock look has now been perfected. We have taken our Duesenberg design and have melded it into the pure rage of heavy rock creating the classic German black & white look on a guitar that will truly launch you out of sight. The Rocket crunches out the tones through our custom Humbuckers that only Duesenberg can give. The DRK continues with the classic art-deco design using our vintage 25.5" scale. Every bit of this guitar meets our highest standards.

PICKUPS	CONTROLS	BODY	HARDWARE

Starplayer Special

DSP Starplayer Special

Our Starplayer Special was first prototyped in 1992 and voted "Guitar of the Year" in UK in 2003. Our maple neck and rosewood fingerboard delivers a distinctive attack and clarity not usually associated with this body type. The DSP with its Alder body comes with a 12mm/ 0.47" Canadian Maple top. These combinations present an exceptional sound and clarity that brings sweet thick tones and long sustain. A choice of opaque or sparkle colors impart a rich visual identity.

V-Caster

DVC V-Caster

This guitar features an American solid alder body, 3 custom alnico single magnet pickups, and a Diego Deluxe tremolo (also available in a non-trem version). The V-Caster guitar provides all the clarity and spank with more lower-midrange emphasis. This creates a gloriously thick-sounding machine with none of the annoying brittleness of many single-coil designed guitars. Featuring the elegant headstock and pick guard shape of our entire line, the DVC and the DVCT have an open back showing the classic look of the springs to the bridge.

PICKUPS	CONTROLS	BODY
Custom Duesenberg-V Single Coils with single alnico magnets. Middle pickup: Reverse Wound = Reverse Polarity	Master Volume, Master Tone, 3-Way Pickup Selector	Solid American Alder, Body size: 44 x 32,5 x 4,5cm – 17.32" x 12.6" x 1.77"

The new TRI-TONE Control adds the middle pickup to the signal when turned toward the far right position. When turned to the far left, the treble will be turned down. When moved to the middle or center position the middle pickup is turned off allowing the bridge and neck pickups to rock. So give it a turn to the "right" and you will have your mids tones along with the sound of our 3-pickups.

TREMOLO	BRIDGE
Vintage Sheet Steel with Aluminum Block	Vintage Sheet Steel

Violin Bass

BASS GUITARS

At the beginning of the music revolution in the 1960s a few German companies started building instruments that influenced the music industry. Duesenberg has continued this tradition. Our bass collection has been painstakingly designed to ensure that weight reduction and the redesigned scale length of 77cm / 30.31" has not compromised tone or feel.

DBV Violin Bass

The look alone says it all. The DVB has the classic feel of the 60s with Duesenberg's unsurpassed quality and style. This hollow body DVB will rock your soul to the sounds of the past and propel you into the 21st century.

PICKUPS	HARDWARE	BODY
